SKILLS

Frontend: HTML, CSS, Bootstrap, JavaScript, React.js

Backend: Node.js, Express

Databases: SQLite, MongoDB

Other skills: Express(node), Flexbox, Git, Redux

PROJECTS

Job Analytics (<https://jobanalytic.netlify.app>)

A Full-Stack MERN application helps users organize their job search, track progress, and analyze where they are getting stuck, such as HR or technical rounds

- Job app tracking with analytics dashboard.
- JWT-based authentication and protected APIs.
- Resume skill analysis with suggestions.

Technologies used: React.js, Material UI, Express.js, Node.js, MongoDB

Super App Dashboard (<https://superapdashboard.netlify.app>)

A responsive React-based productivity dashboard that combines multiple utilities into a single application, including weather updates, latest news, entertainment, notes, and countdown timer.

- Integrated Weather, Movies (TMDB), and News APIs to display real-time information.
- Implemented category-wise movie recommendations with an interactive movie details modal.
- Built desktop dashboard with user profile, notes, countdown timer, and local storage support.

Technologies used: React.js, CSS3, TMDB API, Open Weather API

Smart Trip AI (<https://smartripai.netlify.app>)

An AI-powered Full-Stack MERN application that generates personalized travel itineraries, hotel recommendations, budget estimates, and packing lists using Google Gemini AI.

- AI-powered travel itinerary generation based on destination, duration, budget, and user interests.
- Regenerate individual travel days using Google Gemini AI and manage itinerary activities with add/remove functionality.
- AI-generated hotel recommendations, budget estimation, and destination-specific packing.
- JWT-based authentication with protected routes and user-specific trip management.

Technologies used: React.js, Material UI, Express.js, Node.js, MongoDB, Google Gemini AI
